

### Evaluating Institutional Arrangements for Arctic Marine Shipping Management

WITHIN THE NORTHERN LOW IMPACT SHIPPING CORRIDORS USING MULTIPLE CRITERIA DECISION ANALYSIS

Weishan Wang

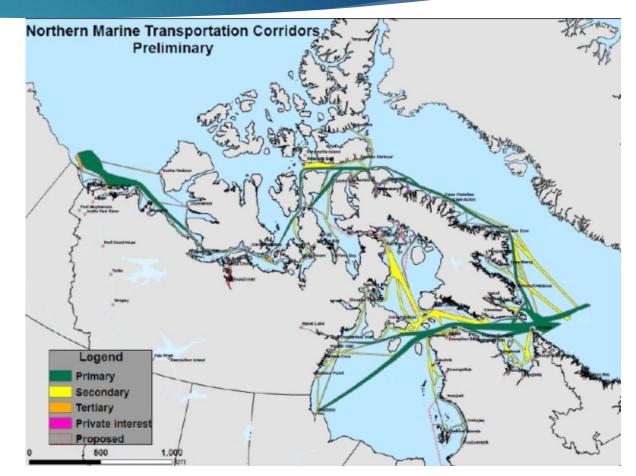

December 2<sup>nd</sup>, 2019

#### Outline

- Internship MMM GP
  - Co-Supervised by Dr. Ronald Pelot and Dr. Jackie Dawson
- Management Problem
- Research questions
- Approaches
- Results
- Recommendations

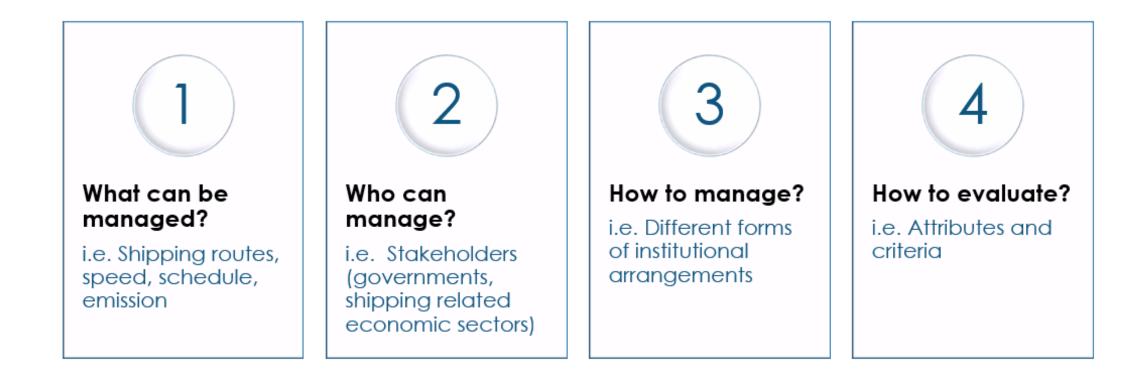

## Management Problem

- Increasing shipping activities present risks and negative impacts
- The Oceans Protection Plan (TC) and the 'Low Impact Shipping Corridors' or 'Corridors'
- Preliminary design of the Corridors overlaps with some socio-ecological sensitive areas.
- Lack of an appropriate institutional arrangement for integrating multiple stakeholders into decision-making process within the Corridors.

Source: Canadian Coast Guard

### Research Questions

## Approaches

#### Literature review- shape the scope and objectives

 Marine shipping activities within the Corridors mainly refer to commercial shipping activities while fishing and cruise tourism activities are secondary for analysis.

#### MCDA- key methodology

- Definition: Multiple Criteria Decision Analysis (MCDA)
- Applied areas: natural resources management, spatial planning and on-land corridors' design (combined with GIS)
- Key elements: Decision makers, Alternatives and Criteria

### Approaches

#### MCDA decision matrix

Table. 1 MCDA decision matrix

|             | Institutional forms       | Co-<br>management     | Co-<br>governance     | Shared<br>Leadership  |
|-------------|---------------------------|-----------------------|-----------------------|-----------------------|
| Attributes  | Alternatives<br>Criterion | Alternative 1<br>(A1) | Alternative 2<br>(A2) | Alternative 3<br>(A3) |
| Attribute 1 | Criterion 1 (C1)          | A1C1                  | A2C1                  | A3C1                  |

#### Three alternatives

#### Table 4. A Comparison among Three Forms of Institutional Arrangements

|                           | Co-management  | Co-governance   | Shared Leadership   |
|---------------------------|--|---|---|
| Definition                | Co-management is an<br>institutional arrangement,<br>whereby multiple<br>stakeholders achieve an<br>agreement covering a<br>specific geographic region<br>and make decisions affecting<br>multiple actors. | Arrangements in which<br>ultimate decision-making<br>authority resides with a<br>collaborative body, where<br>power and responsibility<br>are shared between<br>government and local<br>stakeholders. | A property of a group<br>where leadership functions<br>are distributed among<br>group members.<br>Shared leadership offers a<br>concept of leadership<br>practice as a group-level<br>phenomenon. |
| Application<br>areas      | Resource management<br>(fisheries, wildlife and<br>natural resources); marine<br>protected areas   | Resource management<br>(fisheries, wildlife and<br>natural resources); marine<br>reserves   | Business area: team<br>building and school<br>education   |
| Selected best<br>practice | Four co-management boards<br>in Nunavut, Canada  | Natural Resource<br>Management (NRM)<br>programme, Australia  | New Shared Arctic<br>Leadership Model   |

| Attributes              | Criteria  |  |  |  |  |
|-------------------------|---|--|--|--|--|
| Integrity of decision   | 1. Does the institution arrangement include complete rules/regulations for decision making procedures such as:        |  |  |  |  |
| making procedures       | <ul> <li>Proposal rating/ranking/selection;</li> </ul>  |  |  |  |  |
|                         | <ul> <li>Trade-offs;</li> </ul>   |  |  |  |  |
|                         | <ul> <li>Voting system/process.</li> </ul>  |  |  |  |  |
|                         | 2. Does the institution arrangement have guidelines/principles for encouraging public participating in the decision-  |  |  |  |  |
|                         | making procedures?  |  |  |  |  |
| Legal basis and         | 3. Which legislative level is this institutional arrangement based on?  |  |  |  |  |
| Jurisdiction            | <ul> <li>Land Claims Agreement;</li> </ul>  |  |  |  |  |
|                         | <ul> <li>Federal regulations/laws/memorandums of understanding;</li> </ul>  |  |  |  |  |
|                         | <ul> <li>Official/Public documents of federal, territorial, local department.</li> </ul>                              |  |  |  |  |
|                         | 4. This arrangement usually involves a single/multiple governance level.  |  |  |  |  |
|                         | 5. This arrangement is usually used in single/small/multiple/large jurisdiction(s).                                   |  |  |  |  |
| Specificity and Clarity | 6. Is this institutional arrangement usually used for solving broad/comprehensive/specific/simple issues?             |  |  |  |  |
|                         | 7. Does the arrangement have a clear/vague purpose/targets?   |  |  |  |  |
|                         | 8. Do the stakeholders/decision makers participating in this arrangement have clear/vague roles and responsibilities? |  |  |  |  |
| Financial support for   | 9. Does this institutional arrangement have adequate/inadequate financial support from                                |  |  |  |  |
| the institutional body  | government/organization/company?  |  |  |  |  |
|                         | 10. Does this management/governance body have constant/intermittent financial support?                                |  |  |  |  |
| Degree of Collaboration | 11. Does this institutional arrangement take both economic and socio-ecological impacts into consideration during     |  |  |  |  |
|                         | decision-making process?  |  |  |  |  |
|                         | 12. Does this arrangement consider both scientific knowledge and traditional ecological knowledge (TEK) in its        |  |  |  |  |
|                         | knowledge co-production processes?  |  |  |  |  |
| Representativeness      | 13. Stakeholders in the management/governance board are from all/some/part of/limited sectors related to the          |  |  |  |  |
|                         | management issue.   |  |  |  |  |
|                         | 14. Can this arrangement reflect all/most/some different interests of different stakeholders.                         |  |  |  |  |
| Equality                | 15. Equal/unequal power/voting rights/veto in decision-making process;  |  |  |  |  |
|                         | 16. Each stakeholder is impacted/benefited fairly.  |  |  |  |  |

| Institutional arrangements                  |                       | Co-           | Co-           | Shared        |   |
|---|-----------------------|---------------|---------------|---------------|---|
|   |                       | management    | governance    | Leadership    |   |
| Alternatives                                |                       | Alternative 1 | Alternative 2 | Alternative 3 |   |
| Attributes Criterion                        |                       | (A1)          | (A2)          | (A3)          |   |
| Integrity of decision<br>making procedures  | Criterion 1<br>(C1)   | A1C1          | A2C1          | A3C1          |   |
|   | Criterion 2<br>(C2)   | A1C2          | A2C2          | A3C2          |   |
| Legal basis and<br>jurisdiction             | Criterion 3<br>(C3)   | A1C3          | A2C3          | A3C3          |   |
| Juniorenon                                  | Criterion 4<br>(C4)   | A1C4          | A2C4          | A3C4          | r |
|   | Criterion 5<br>(C5)   | A1C5          | A2C5          | A3C5          | D |
| Specificity and clarity                     | Criterion 6<br>(C6)   | A1C6          | A2C6          | A3C6          |   |
|   | Criterion 7<br>(C7)   | A1C7          | A2C7          | A3C7          | U |
|   | Criterion 8<br>(C8)   | A1C8          | A2C8          | A3C8          |   |

#### DA Decision Matrix Ults Summary of MCDA Decision Matrix

X

|                      | Green<br>(High) | Yellow<br>(Medium) | Red (Low) |
|----------------------|-----------------|--------------------|-----------|
| Co-<br>management    | 15              | 2                  | 3         |
| Co-governance        | 11              | 9                  | 0         |
| Shared<br>Leadership | 4               | 8                  | 8         |

### Recommendations

1. Allocate weights to MCDA criteria and use weighted calculation to get precise results.

Weights can be discussed in advance by stakeholders.

2. Reach consensus previously by promote gradual consultations.

Consider different interests and select attributes and criteria

 3. Develop instructions, guidelines and principles for decision-making process.
 Improve the overall effectiveness of MCDA
